Advanced wound care, connected from start to finish.

One conviction defines us: every patient deserves to move forward. Every team deserves the support that makes it possible. AOR was founded to close the gaps that disrupt wound care, and that origin guides every decision. Behind every wound is a person who needs care and a team that needs support. That is why we support clinics, hospitals and long-term care facilities with solution selection, team education, digital documentation and supply coordination.

> **“Innovation drives us. Every patient gives us purpose.”**

Portfolio categories

With AOR, you can explore advanced wound care solutions, with clear information and support for your team. Specifications, indications and use of each product are found in its manufacturer's official documentation.

Amniotic & placental membranes

Donated human tissue allografts used as a protective covering or barrier according to each manufacturer's instructions.

Acellular dermal matrices

Processed human dermis without cells, for professional use per manufacturer labeling.

Collagen

Collagen devices for managing partial- and full-thickness wounds, per their indications.

Autologous platelet gel

Point-of-care systems that prepare a gel from the patient's own blood, per the manufacturer's Instructions for Use.

Wound irrigation

Solutions for cleansing and irrigating acute and chronic wounds.

Tissue imaging

Image capture and measurement to support clinical documentation; interpretation remains with the clinician.

Dressings, supplies & compression

Advanced Solution supply lines: daily kits, dressings, antimicrobials, compression and offloading.

How we work with you

01
We understand the need

We learn about your wound program, care setting and what your team needs to review.

02
We review options

We present portfolio products with manufacturer information, without replacing clinical judgment.

03
We coordinate supply

We coordinate availability, ordering and the next supply steps with the appropriate provider, as agreed.

04
We support your team

We coordinate manufacturer education and documentation with AOR HealIQ when appropriate.

Five fronts, one institutional partner

All AOR platforms are operational and available for institutional implementation. Each implementation is configured with the institution.

Specialized products

Wound care solutions that support the healthcare professional's decisions according to each patient's needs.

AOR HealIQ

Wound assessment, measurement, documentation and follow-up to support better-informed decisions.

AOR Intelligence

Multispecialty coordination, quality and readmission follow-up, and information integration across teams.

OMNI Protocol

Denial management and appeal preparation with evidence, professional review and follow-up.

Institutional support

Education, guidance and support to bring AOR solutions into your team's processes.

Leadership

Américo Ortiz Rivera

FOUNDER & CEO

Américo Ortiz Rivera founded AOR Medical Solutions with a certainty: patient recovery takes supported professionals and solutions that keep care continuous. With more than 25 years of experience working alongside physicians, health organizations and payers, he built a company that brings together specialized products, clinical technology and institutional support to turn that conviction into concrete action. His commitment is clear: to be the strategic partner who answers, delivers and stays beside the team.
